MUNDYS: ABERTIS COMPLETES ACQUISITION OF 100% STAKE IN FRANCE'S A63 MOTORWAY

Paris, 25 March 2026 – Abertis, the motorway developer and operator owned by Mundys and ACS, has acquired a 100% stake in the A-63 motorway located in southwest France. Having acquired a 51% stake from AXA nearly a year ago, Abertis has now further increased its investment, acquiring the remaining 49% of the asset from the non-controlling shareholders, HICL Infrastructure, CVC DIF and NGE Autoroutes.

The A-63 is a 105-kilometre three-lane dual carriageway connecting Salles and Saint-Geours-de-Marenne. This is a key route for light and heavy goods vehicles travelling between France and Spain, linking Bordeaux, with a population of over one million and home to major scientific and engineering facilities, and the cities of Bayonne, Biarritz, Anglet and Saint-Jean-de-Luz.

The decision to also acquire the non-controlling interests reflects Mundys's renewed commitment to investment in France and Europe, further strengthening Abertis's portfolio of motorway assets.

The acquisition guarantees the business's solidity and sustainability, reflecting the type of asset, which represents a strategic corridor for Europe, and the 25-year duration of the concession. In financial terms, the French operator generated revenue of approximately €179 million and EBITDA of €138 million in 2025.

The Mundys Group operates motorway and airport concessions and provides mobility services. The Group operates in 24 countries, with France being Mundys's most important market both in terms of jobs, with the Group employing around 6,000 people in the country, and capital invested, with Mundys controlling assets worth approximately €11 billion.

In addition to Getlink, the Group's French assets include the motorway operators, SANEF, SAPN and A63 (managed via Abertis), and Aéroports de la Côte d'Azur (ACA), which operates Nice airport, the second busiest airport in France. The Group's strategy is sustainability-focused, led by its Climate Action Plan. The Group's sustainability targets are measured and certified, reinforcing the Group's commitment to achieving net zero by 2040.
